DETAILED ACTION

Reasons For Allowance

1. Claims 1-37, 39-57, 61, 63-65, and 70-80 are allowed.

2. The following is an Examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claimed invention of a rule based configuration engine, as claimed by Applicant. Specifically, independent claims 1, 14, 27, and 70 disclose the use of a computer system to test an electronically stored product configuration for errors.

The closest prior art of Dai et al (U.S. Patent Number 5,542,239; dated 19 September 1995; class 703; subclass 019) teaches the implementation of a netlist but fails to teach or suggest the use of a computer system to test an electronically stored product configuration for errors. To the extent that this feature is not found in the prior art cited by Examiner, the present case is held allowable over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
